DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by EP 847,228.

The reference compound No. 85 on page 34 anticipates the claimed compound wherein $R^1 = OCH_3$, $e = 5$, $L^1 = OCH_2$ and $L^4 = \text{phenylene}$. Also, see compounds No. 81 and 87.

3. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Innes (US 3,711,567).

The reference compounds represented by the formula in abstract and claims anticipate the claimed compound. Also, see Example 7.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1756

5. Claims 1-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 847,228.

The reference differs from the claims in that the claims are claimed as a retardation film comprising an optically active layer formed of a compound represented by the present formula (I). The reference compounds with a bis-triphenylene core will expect having discotic properties including negative birefringent, which is known and used in retardation film. Therefore, it would have been obvious to those skilled in the art to utilize the reference compounds having triphenylene core and used in the claimed retardation film.

Allowable Subject Matter

6. Claims 5 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 9:30 AM to 6:00 PM.
